

BIOTRONIK Preceptorship Program on Cardiac Resynchronization Therapy / Conduction System Pacing

Course Director: Prof. A. Bulava

Date	Monday, June 13rd to Saturday, June 18st 2022
Goal	The program has been designed to be highly interactive and to maximize the active exchange of ideas between participant and preceptors. Live cases of CRT & CSP implantations have an emphasis on implantation techniques and trouble shooting. The aim of this training is to build more experience in pocket preparation, lead positioning, intraoperative measurements, device programming and patient follow ups.
